

Alcohol and Drug testing specialists

Covid19 crisis calls for a new approach to breath alcohol testing. Introducing the new

AlcoBlow® *Rapid Test* **Shield**

Hands free, social distancing, no contact, safe breathalyser testing

The fastest, easiest to use breathalyser ever devised. AlcoBlow® Rapid test now has a shield to assist in protecting the user against the possible infection of covid 19. It is the breathalyzer of choice for security and mine

1. Durable Perspex shield fits easily over the sample end of the AlcoBlow Rapid Test.

The shield fits tightly over the end of the AlcoBlow and ensures no air from the person being tested gets onto the hands of the Operator.

2. The shield is an extra layer of protection for the operator of a hand held breathalyser, deflecting the air away from their hands, bodies and faces.
